

Defense Metals Announces Inclusion in New Sprott Rare Earths Ex-China ETF

Vancouver, British Columbia – April 16, 2026: Defense Metals Corp. (“Defense Metals” or the “Company”) (TSX-V: DEFN / OTCQB:DFMTF / FSE:35D), a company focused on the development of the Wicheeda Rare Earth Project (“Wicheeda Project”), located near Prince George, British Columbia, Canada, is pleased to announce that it has been included in the newly launched Sprott Rare Earth Ex-China ETF (“ETF” or “REXC”), the only ETF providing focused exposure to rare earths companies outside of China.

"We are very pleased to have met the requirements for inclusion in the new Sprott Rare Earth Ex-China ETF, representing validation of our success in advancing our Wicheeda (“REE”) Project in British Columbia," commented Mark Tory, Defense Metals’ President and CEO. "Inclusion in this new ETF has the potential to attract additional institutional investment into Defense Metals and increase liquidity, as the ETF is expected to be an important benchmark for investors focused on this critical materials segment of the market."

The Sprott Rare Earths Ex-China ETF is designed to track the performance of global companies engaged in the mining, separation, refining and production of rare earth elements, while excluding companies domiciled in or primarily operating in China.

About Defense Metals Corp. and the Wicheeda Rare Earth Element Project

Defense Metals Corp. is an advanced rare earth elements (“REE”) exploration and development company focused on delivering strategically critical metals to Western defense, high-technology, and clean energy supply chains. The Company’s primary asset is its 100%-owned Wicheeda Rare Earth Element Project, located near Prince George, British Columbia, Canada.

The Wicheeda Project is one of the most advanced undeveloped rare earth deposits in North America or Europe, featuring a robust mineral resource and mining reserve, as detailed in the Company’s 2025 Pre Feasibility Study (“PFS”) (refer to Company News Release April 7th, 2025) prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects. The PFS, showed the economic potential of the deposit, supporting future project development.

Defense Metals is committed to advancing the Wicheeda Project through the Feasibility Study stage, permitting, and ultimately into production, positioning the Company to become a reliable supplier of critical rare earths that are essential to modern defence systems, advanced manufacturing, and energy-efficient technologies.

The PFS for the Wicheeda Rare Earth Element Project is preliminary in nature and includes numerous assumptions regarding metallurgy, capital and operating costs, and market conditions.

Mineral reserves and the economic outcomes projected in the PFS are subject to significant uncertainties, and there is no certainty that the results of the PFS will be realized. Additional studies, including a Definitive Feasibility Study (“DFS”) and permitting work, are required before a production decision can be made.

Cautionary Statement Regarding “Forward-Looking” Information

This news release contains "forward-looking information or statements" within the meaning of applicable securities laws, which may include, without limitation, any statements (expressed or implied) relating to: advancing the Wicheeda Project and the proposed debt settlement. Forward-looking statements are typically identified by words such as "plan," "believe," "expect," "anticipate," "intend," "outlook," "estimate," "forecast," "project," "continue," "could," "may," "might," "possible," "potential," "predict," "should," "would" and other similar words and expressions, but the absence of these words does not mean that a statement is not forward-looking. All statements in this news release, other than statements of historical facts, that address events, contribution or developments that the Company expects to occur, are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which the Company will operate in the future, including the price of rare earth elements, the anticipated costs and expenditures, the ability to achieve its goals, that general business and economic conditions will not change in a material adverse manner, that financing will be available if and when needed and on reasonable terms. Such forward-looking information reflects the Company's views with respect to future events and is subject to risks, uncertainties and assumptions, including the risks and uncertainties relating to the interpretation of exploration and metallurgical results, risks related to the inherent uncertainty of exploration and development and cost estimates, the potential for unexpected costs and expenses and those other risks filed under the Company's profile on SEDAR+ (www.sedarplus.ca). While such estimates and assumptions are considered reasonable by the management of the Company, they are inherently subject to significant business, economic, competitive and regulatory uncertainties and risks. Factors that could cause actual results to differ materially from those in forward looking statements include, but are not limited to, continued availability of capital and financing and general economic, market or business conditions,
